On August 15, 2017, a lab report provided to the probation officer revealed the offender submitted a urine specimen, on August 10, 2017, which tested positive for amphetamines. On August 22, 2017, Ms. Diaz signed an admit/deny form admitting to the use of her sister's prescription medication, specifically Adderall.

U.S. Probation Officer Action:

On June 12, 2017, Ms. Diaz commenced her three year term of supervised release in San Antonio, Texas. She has an extensive drug and mental health history and recently lapsed on un-prescribed medications. Due to her lapse, and as a corrective intervention, Ms. Diaz was referred to the inpatient substance abuse treatment program at Alpha Home; however, prior to her admittance into the program, she used her sister's prescription medication and tested positive for amphetamines.

Since entering the inpatient treatment program, on August 21, 2017, Ms. Diaz has not incurred any violations. Her counselor reported she was doing well and was recently selected as a Senior Peer, a resident who helps welcome other female offenders into treatment. She is closely working with her counselor and appears committed to living a drug free life. Ms. Diaz will be closely monitored to ensure she continues to display a willingness to successfully complete the inpatient treatment program and develop a relapse prevention plan.

It is respectfully recommended the Court take no action at this time to allow Ms. Diaz the opportunity to complete the inpatient treatment program. Upon completion, she will continue to participate in an outpatient treatment program until she is successfully discharged. Ms. Diaz has been advised that should she incur any other violations, the Court will be promptly notified.
